## EDITOR'S CHOICE

The latest NMC regulation released on August 2nd 2023, named "The Registered Medical Practitioner (Professional Conduct) Regulations, 2023 stated that all doctors must prescribe generic drugs instead of branded drugs and those failing to do so will be penalised and their licence to practice would be suspended for a period of time.

This regulation raised several concerns among all doctors. Several practitioners have experienced poor response of patients to generic drugs. Those on long term medication for chronic diseases have shown reduced control of the disease (Diabetes and Hypertension to name a few) after being switched to generic drugs. Due to these observations, a question arises about the quality of these drugs.

Due to the importance of effectiveness of any drug in the management of a disease, such regulations should not be put in place unless there is regular Quality Assurance checks that are made for the quality of the drugs and the safety of the additives and adjuvants present in the generic drugs. Unless these drugs can be tested and certified to be of equal quality as of branded drugs, it would be best in the interest of the community and general population as a whole, to avoid such regulations from being applied.

Due to this, the regulation met with a heavy backlash from all practitioners and the Indian Medical Association (IMA) along with the Indian Pharmaceutical Alliance met the Union Health Minister, Mr. Mansukh Mandaviya, and expressed their concerns regarding the quality of the generic drugs. Due to the intervention of the IMA, the NMC has officially put the regulation on hold till further notice.

## INDEPENDENCE DAY CELEBRATION AT AIMS&RC

77 years of learning, growing, and celebrating our nation's Independence Day together at Akash Institute of Medical Sciences and Research Centre and Akash Hospital. Independence Day was celebrated by hoisting the national flag in the premises, led by our **Chairman, Sree Muniraju K,** and **Vice Chairman, Sree Amar Gowda.**

## FOUNDERS' DAY, 28TH JUNE 2023

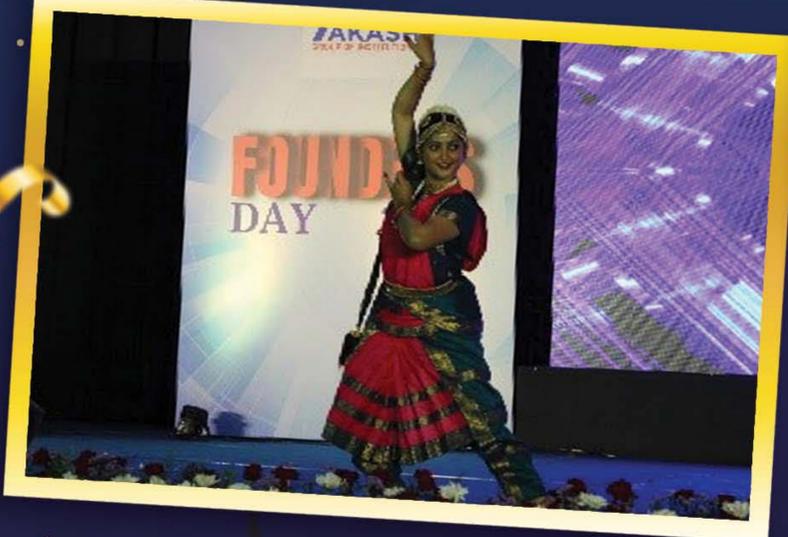

On the occasion of Founder's Day, celebrated on 28th June 2023, a special event was organized to commemorate the day. The event was marked by the celebration of Sree Muniraju K's birthday, who serves as the Chairman of the institution.

During the event, Sree Muniraju K delivered a heartfelt speech to the gathered audience. In his speech, he emphasized the importance of unity and solidarity within the institution. He laid stress on the need for all members of the institution to come together as one cohesive team to achieve its goals and maintain its success.

Sree Muniraju K expressed his gratitude to everyone who has contributed to the institution's success over the years. He acknowledged the hard work and dedication of the staff, faculty, students, and all stakeholders who have played a role in making the institution what it is today.

He encouraged everyone to continue their efforts and commitment to the institute's mission and vision. He emphasized that it is through collective effort and a shared sense of purpose that the institute can continue to thrive and grow.

## FOUNDERS' DAY, 28TH JUNE 2023

The Founder's Day event, which also doubled as Sree Muniraju K's birthday celebration, was a meaningful occasion to reflect on the institution's journey and renew the commitment to its future success.

To celebrate our diverse heritage and traditions that have shaped the organization, we organize cultural events, festivals, and exhibitions.

We host cultural performances, music, and dance shows that reflect our organization's rich heritage and culture.

We extend our heartfelt thanks to all attendees for being a part of this special occasion, including **Chairperson Mrs. Pushpa Muniraju, Vice Chairman Sree Amar Gowda & Sree Akash Gowda, Dr. Naresh Shetty (CEO), Dr. Shivaprakash N C (Dean & Principal Aimsrsc), Dr. Brijesh (Medical Superintendent AH), Dr. Preetham R P (Principal Nursing), Dr. Roopa Lokesh (Principal Physiotherapy),** and all students and faculty.

## DEPARTMENT OF DERMATOLOGY:

**Before**

**After being treated with  
Excimer Laser Machine**

## EXCIMER LASER MACHINE

Vitiligo is a condition in which areas of the skin lose their normal pigment and become white. It affects about 1% of the world's population and can occur anywhere on the body, with common areas being the lips, fingers, and face.

At the **Cosmetology Clinic of Akash Hospital**, we offer advanced vitiligo treatment options, including the Excimer Laser Machine. This machine provides targeted phototherapy, delivering a specific wavelength (308nm) of ultraviolet B radiation to affected areas.

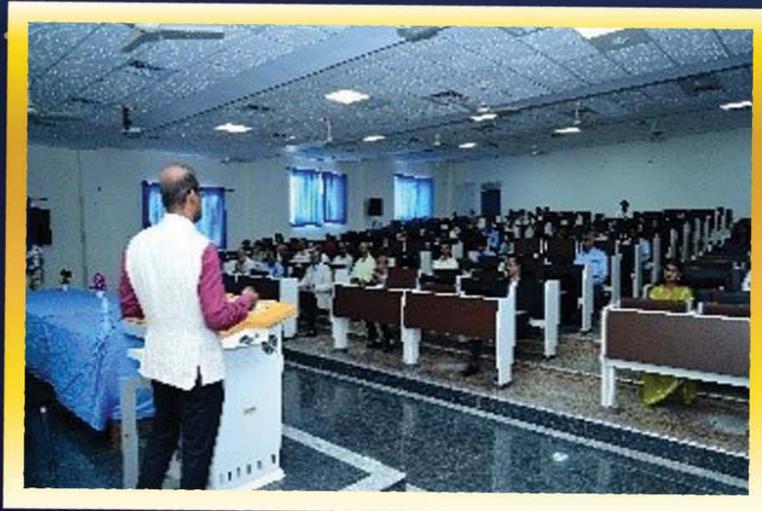

### Advantages of targeted phototherapy:

1. Healthy skin surrounding affected areas is not exposed to radiation.
2. Different templates are used for treatment depending on the area.
3. A higher dose of radiation can be delivered with reduced cumulative irradiation.
4. In some cases, a shorter treatment course is effective.
5. It can be used in areas difficult to reach with conventional phototherapy, such as ears and genitals.

Our Cosmetology Clinic offers a wide range of treatment options for vitiligo cases, including various medical and surgical modalities.

## CME PROGRAMME BY DEPT OF EMERGENCY MEDICINE

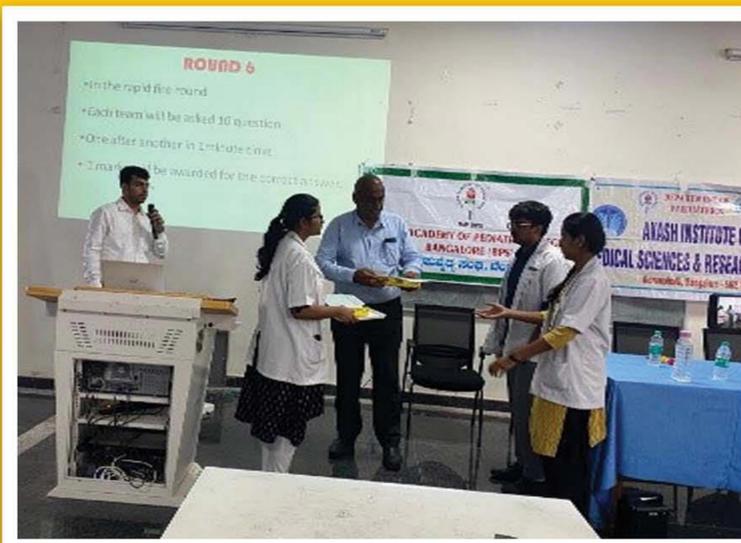

An eventful day at Akash Institute of Medical Sciences and Research Centre (AIMSRC). ## ORIENTATION PROGRAM ON PHLEBOTOMY AND SAMPLE COLLECTION PROCEDURES BY CENTRAL LAB AT AKASH HOSPITAL

The Department of Central Laboratory at Akash Hospital organized an orientation program on **phlebotomy and sample collection procedures**, along with protocols for various lab investigations. This program was designed for nursing staff, interns, and postgraduate students of clinical departments and was conducted in three divided batches on 19/07/2023, 26/07/2023, and 2/08/2023.

The sessions were led by the faculty of the **Department of Microbiology, Pathology, and Biochemistry**, with oversight from the Director in charge of the Central Laboratory, Dr. Rashmi, at Akash Hospital.

## FAMILY ADOPTION PROGRAM BY MBBS STUDENTS OF AIMSRC

In Kundana, the backbone breadwinner of the country, Dr. Sunil Kumar, Head of the Community Medicine Department at Akash Hospital, emphasized the importance of health. He spoke at a free health check-up camp organized by Akash Medical College and Research Centre, in collaboration with the Department of Community Medicine, under the Central Government's Family Adoption program by MBBS students. This event took place on the premises of Muddanayakanahalli Milk Producers Co-operative Society in Hobli on Friday.

Dr. Sunil Kumar explained that, as part of this initiative, villages lacking nearby hospital facilities, such as Karahalli, Bidlur, and Muddanayakanahalli, which are 25 to 30 km away from Devanahalli taluk, have been chosen. In this program, five houses have been assigned to each MBBS student from Akash Hospital. These students will educate the members of these families about health and well-being.

Additionally, Dr. Sunil Kumar mentioned that free health camps will be organized, with check-ups scheduled every six months. Given the onset of the rainy season, residents will also be advised on maintaining cleanliness in the village and taking precautions against diseases like Dengue and Chikungunya.

The Akash Hospital Community Medicine department, led by Dr. Vidya, Dr. Shanti, and Dr. Lakshmi, along with the Marketing Department under the guidance of Mr. Srikanth and his team, organized this impactful camp. The event also saw the presence of Mr. Anjinappa from the Karahalli Gram Panchayat.

## WORLD BREASTFEEDING WEEK BY DEPARTMENT OF PEDIATRICS

The Department of Pediatrics at Akash Institute of Medical Sciences and Research Centre, in association with IAP-BANGLORE BPS, organized an event on 4th August 2023 to commemorate **World Breastfeeding Week**, celebrated globally from 1st to 7th August 2023. During this event, students from Akash Institute of Physiotherapy performed a skit focused on raising awareness about breastfeeding among working parents. The theme of the event was "**Enabling Breastfeeding - Making a difference for working parents.**"

**Professor Dr. Roopa Lokesh, the Principal of Akash College of Physiotherapy**, delivered a speech emphasizing the crucial roles of both mothers and fathers in supporting breastfeeding. She highlighted the need to create a supportive environment that enables breastfeeding for the health and well-being of the child.

This collaborative effort between **Akash Institute of Physiotherapy and the Department of Pediatrics at Akash Institute of Medical Sciences and Research Centre** aimed to promote and support breastfeeding practices.

## BASIC CARE LIFE SUPPORT COURSE AT AKASH INSTITUTE OF PHYSIOTHERAPY

Akash Institute of Physiotherapy conducted a **Basic Life Care Support (BCLS)** certification course on 27th June 2023. The course was inaugurated by **Sri. Muniraju, Chairman of AIMS & RC**, and **Dr. Shivaprakash N C, Dean & Principal of AIMS & RC**. The BCLS course was a flagship project of **RGUHS (Rajiv Gandhi University of Health Sciences)**, and the BCLS team was facilitated by **Sri. Muniraju and Prof. Dr. Roopa Lokesh, Principal of Akash Institute of Physiotherapy**.

Completing the BCLS course equipped participants with valuable knowledge and practical skills for responding to cardiac emergencies. The comprehensive training covered CPR techniques, **AED (Automated External Defibrillator) usage**, and basic life support algorithms. This training has empowered participants with the confidence to act swiftly and effectively during critical situations. The BCLS certification stands as a testament to their commitment to saving lives and improving the safety of individuals and communities.
